Lecture by Professor Nevan Fisher
“China in the 20th and 21st Centuries: Does the Dragon Roar or Whimper?”

Professor Nevan Fisher of Nazareth College explores the many contradictions of contemporary China - a country that is simultaneously exploding with new wealth, new opportunities and social and environmental problems so severe as to be crippling, China is on the cusp of the unknown. Fisher’s talk highlights differences between rural and urban China, and weaves history and politics with observation and anecdote.
