IN THE GALLERIES

See MAG’s latest exhibition *Meleko Mokgosi: Pax Kaffraria*. *Pax Kaffraria* depicts the history of a fictional African nation. It features founding myths and legends of national triumph. An agrarian culture develops into an industrial power and modern society. Flags wave, leaders command, and the pomp and circumstance are televised for viewers who choose to watch the events from the comfort of their homes. There are references to shared values and prosperity—and to attendant threats of possible future decline.
