The Memorial Art Gallery’s Creative Workshop is Rochester’s art school for all ages. See inside for more than 160 classes from beginner to advanced, one day to ten weeks, clay to painting. We offer art classes for everyone!
welcome to the workshop

From a new sign and new brochure to a longstanding tradition, ours is a busy, colorful, funny and fantastic school where art is nourished and a community continues to inspire.

As we write this, it’s a typical Thursday in summer—energetic children are walking into the Gallery to look at an animal sculptures before they make their own, longtime adult painting students are walking in to see the new exhibit before a lecture by a visiting artist, and teachers are dropping off artworks fresh from their studios for the Creative Workshop’s latest Faculty Show. You may feel it is harder than ever to make art, but it doesn’t seem so here. We have plenty of concentration, communication, creativity and good humor.

You hold in your hands (or see virtually on this screen) a guide to more than 160 art classes held at the Workshop between September 2009 and March 2010.

This newly expanded brochure contains classes for just about any artistic endeavor. We suggest you wander through this brochure with an eye on your own interest. When done reading, give us a call, send us an email, or come on in and consider what you or your child can create, and what can happen if you bring more art into your world. Classes will start as soon as September 22 and as late as February.

We hope to meet you at our upcoming open houses (Clothesline or December 12) if not before. For more about open houses, turn to page 17 of this brochure.

OUR (WORKING) PHILOSOPHY

Since 1927, the Creative Workshop has helped children grow as artists and as well-rounded human beings. Our classes teach the technical skills of drawing, painting, ceramics and jewelry making while encouraging kids to recognize their natural talents and creative strengths.

Our instructors are friendly and committed to starting children in the habits of drawing, collaborating and solving problems with innovative solutions.

Our approach to art classes for children is to keep class sizes small and continuously challenge kids to try new materials and learn traditional methods of art and craft. While most classes go into the Gallery at least once a session, classes specifically related to the collection will frequently draw, look at and discuss art.

Classes are listed by age grouping and subject matter. Some are shorter to accommodate children's busy lives (it IS possible to draw cartoons and play soccer, though not at the same time)!

Call us at 585-276-8959 and we can help you find the right class for your child.

### Drawing

Drawing is a core art skill that we know how to teach. Drawing realistically or in an abstract manner is easier and more satisfying after you develop skills in rendering, measuring, and shading to create form. Learning to draw or draw better is also about learning to see, learning a new language, and finding your way around the best tools and techniques used by artists for centuries.

If you are just starting, we recommend that you begin with one of the short classes listed below or Beginning Drawing (if you have little or no experience) or Drawing in the Galleries (if you have some experience).

If you've been working on your drawings, Drawing or Drawing in the Galleries can challenge you to draw in new ways and strengthen your existing skills.

If you are particularly interested in working from the human figure, we recommend Figure Drawing, Portraiture or Drawing the Flesh.

### Drawing for Pleasure

Five Tuesdays, 9:30 am–12:30 pm, September 29–October 27 [fall 31547] [taught by Lisa Myers]

Four Tuesdays, 6:30–9:30 pm, February 23–March 16 [winter 31548] [taught by Cody Kroll]

**Short class!** Do you want to draw but fear that you can’t? You can. You will start where you are: drawing small objects, and doodling. Your instructor will help you find more ways to draw for your own enjoyment. You will explore mark making with a variety of materials, draw outside and in the galleries, and enjoy yourself as you develop your drawing and creative skills. This class is an excellent short introduction or re-introduction to drawing. We recommend you follow this up with Beginning Drawing or Drawing in the Galleries.

Fee for 31547: $131 (members $118)
Fee for 31548: $106 (members $95)

### SIGHT SIZE

You’ll start with copying from master drawings to understand sight-size principles. Perfect for beginners and helpful to advanced students who can benefit from learning a new technique. Supply kit will be available for sale.

Painting

Painting classes can help anyone gain a deeper understanding of color, make paintings with expressive meaning, and document the world in creative visual form. We teach skills, materials and strategies, while encouraging individual creative growth. Many find it easier to find their own voice as a painter in a room of others doing the same. Those with years of experience painting find camaraderie in advanced classes.

We believe that anyone can make a great painting: with the right attitude, hard work, and solid instruction. We offer classes in all media at the beginning, intermediate and advanced level. Our instructors paint in a variety of styles and teach following their own working theories, but all of our painting classes teach students to find the way of painting that suits their own needs.

Finding the right class

For those dreaming of painting but with no previous experience, we recommend taking Beginning Drawing or Drawing into Painting first. Classes, regardless of title, can be taken more than once.

If you have some experience (a beginning class, motivated work on your own, or instruction at any point in your life), you will feel comfortable in a class like Painting or Watercolor. The emphasis will be on helping you achieve what you want in your paintings, understand the materials and techniques better, and get into good painting habits.

In classes at the intermediate and advanced level, students learn through mentoring by skilled instructors, from their peers, and from constructive critiques. At the advanced level, students make work to a high degree of finish and often show their artwork around the community.

Learning from paintings on the wall—your own, your peers’, and Rembrandt, Monet and Homer

All students are invited to participate in regularly scheduled exhibits in the Lucy Burne Gallery of the Creative Workshop (see page 14). Instructors often bring students into the Gallery to learn how Winslow Homer captured water and wind in his paintings, or how the way you hold your brush can change the character of your painting.

For fall 2009, Paint Made Flesh, a traveling show organized by Nashville's Frist Center for the Visual Arts, will be a part of many of our painting classes, allowing students a chance to look at paintings by artists as diverse as Lucian Freud and Pablo Picasso to further their education and continued development as painters.

Using Chinese brushes, students work with ink and water media on rice paper. You will learn to create brush strokes reflecting energy flows, control color bleeding and integrate design elements in expressing your interests. This class and Fun with Asian Brush Painting (above) are fine for anyone—from beginning to advanced students.

Ceramics

To learn to create hand-made ceramic pieces with thoughtful aesthetics is to learn to combine form and function. Our teachers demonstrate and provide step-by-step instruction to help you turn a ball of clay into a mug with a handle. Construction and technical skills (understanding the properties of clay bodies, how to successfully handbuild a form, how to create a form on a potter’s wheel, and how to design and create usable and beautiful objects) are at the core of all of our Ceramics classes. All work is fired in our kilns to a bisque finish and most work is announced at the beginning of each session. Studio clays and tools can be purchased at the Creative Workshop office; all firings and glazes are included in the class fee.

Sculpture

We offer sculpture classes on a regular basis to allow for students to explore creative approaches to working in three dimensions. Sculpture classes teach students how to make functional and artistic pieces in media such as clay, wire, and bronze. Students learn construction, additive and subtractive methods for sculpture. An emphasis is placed on understanding three-dimensional artwork. Instructors teach concepts as well as practical application of these ideas and ideals.

We recommend that you start with Beginning Sculpture, a class in which each student makes several small sculptures.

Portrait Sculpture and Figure Sculpture allow for sculptural practice from a figure model.

Students may wish to take classes more than once or with a different instructor, to increase their experience and to learn a variety of ways to work with the material and creative properties.

JEWELRY
If your goal is to make small metalwork jewelry to a professional finish, we have classes that will help you. The design, fabrication and finish of jewelry requires creativity, careful attention to detail, and project planning skills. Learning to use fine saws for metal and other specialized equipment can take time, but yields rewards in personal projects. Students who take jewelry classes tell us that they were amazed they could learn to set a stone, professionally.

Jewelry classes are excellent for sculptors, dentists, machinists—anyone already or wanting to work accurately, efficiently, and creatively in metal on a small scale. We also find that beautiful jewelry can be made within any budget by any student.

We recommend that you start with Beginning Jewelry (if you have little or no experience) or Jewelry Workshop (if you have some experience.) Short classes in specialized techniques can help you add techniques to your “toolbox” and allow you to make the magical things you want to make. Many students find that existing skills in drawing or ceramics help with their jewelry.

*Offered as a short course*

Three Wednesdays, 10:30–noon, January 6–20 [winter 31656] [taught by Lucy Durkin]

We start with the assumption that you may see more in a work of art than you are able to express in precise words. In this course you will learn the vocabulary (stripped of the jargon) of communicating about art. The ultimate goal is to learn to bring what you know on an intuitive level to a conscious level so that you can share your thoughts with others. Using the Gallery’s collection, examples from the history of art, and special demonstrations by Creative Workshop instructors, you will explore the foundations of looking at art of all varieties. In fully illustrated, engaging discussions Lucy will explain important fundamentals of line, color, form and space. 

Fee for full course (31654 or 31655): $168 (members $151)
