Students learn how to make a watercolor painting from scratch. We will work through a series of carefully defined exercises--requiring only a few basic tools and minimal drawing skill--to create a series of attractive small paintings. Each class will focus on a specific technique; after the introduction we will start by copying a simple pencil drawing and then use that technique to create your painting. A regular part of class will be a 'no fear' and supportive discussion of completed student work. The artist completing this course will take away a tool box of watercolor painting techniques and be prepared to start more ambitious projects of their own.
